

Divide the web page screen in to equal parts

```
<div style="width: 50%; float:left">
```

```
  #left content here
```

```
</div>
```

```
<div style="width: 50%; float:right">
```

```
  #right content here
```

```
</div>
```

Similar code, as above can be used to divide in 3, 4, 5 or more parts.
