PRINCIPLES OF PROGRAMING LANGUAGES

PRACT. Write a program in Java to implement exception handling.

```java
public class JavaExceptionExample{
  public static void main(String args[])
  {
   int a = 10;
   try
   {
      int z= a/0;
   }

   catch(ArithmeticException e)
   {
      System.out.println(e);}
   }
  }
```
