UGC NET 2018 :

In PERT/CPM, the merge event represents _____ of two or more events.

(a) Joining

(b) Completion

(c) Splitting

(d) Beginning

Solution:

What is PERT/CPM ?

To achieve the end goal of a project on time, PERT and CPM are two project management techniques that every management should implement.

PERT is a project management technique, whereby planning, scheduling, organising, coordinating and controlling uncertain activities are done.

CPM is a statistical technique of project management in which planning, scheduling, organising, coordination and control of well-defined activities take place.

In PERT/CPM, the merge event represents completion.
