## RGPV 2020 How can we construct regular grammar from regular expression?

Ans. Lets take an regular expression example: 0\*(1(0+1))\*

Now convert above example in to regular language.

0\*(1(0+1))\*

Conver above regular expression into Right linear regular grammar in step by step.

Step 01:  $S \rightarrow 0S$ Step 02:  $S \rightarrow 0S | A | \in$ Step 03:  $S \rightarrow 0S | A | \in$   $A \rightarrow 1B$ Step 04:  $S \rightarrow 0S | A | \in$   $A \rightarrow 1B$   $B \rightarrow 0A | 1A | 0 | 1$ Conver above regu

Conver above regular expression into Left linear regular grammar in step by step.

Step 01:  $S \rightarrow A \mid \in$ Step 02:  $S \rightarrow A \mid \in$   $A \rightarrow A10 \mid A11 \mid B$ Step 03:  $S \rightarrow A \mid \in$ 

## A -> A10 | A11 | B

B -> B0 | 0
